ACADEMIC PROJECTS

Campus Event Hub
Senior Developer

- Developed a web-based event calendar and participation platform for the college's student organizations as part of a five-member capstone team.
- Built core features using PHP and JavaScript, with Supabase (PostgreSQL) as the backend database.
- Managed version control and collaboration through GitHub.

Personal Portfolio Website
Developer

- Designed and built a responsive portfolio site using HTML5, CSS3, and JavaScript to showcase projects and skills.
- Deployed and hosted the site through Vercel.

Android Mobile Application
Developer

- Developed a native Android application in Kotlin using Android Studio, with SQLite for local data storage.

LEADERSHIP EXPERIENCE

4th Year Level Representative — Fourth Year

- Represent fourth-year students in council meetings, raising their concerns and relaying decisions back to the year level.

College of Information Technology and Engineering Vice President — Third Year

- Supported the college president in leading council operations and coordinating college-wide activities.

3rd Year Representative — Third Year

- Served as the voice of third-year students in council discussions and planning.

Vice President for Event Management — Second Year

- Led the planning and execution of student events, coordinating logistics, schedules, and volunteers.

Class Vice President — First Year

- Assisted the class president in organizing class activities and communicating with classmates and faculty.

CERTIFICATIONS

- Fundamentals of Enterprise Security — Cloudswyft
- Microsoft Excel and Access
